

## Cambridge Neighbourhood Profiles – Research update

The purpose of this research project is to examine the demographics, strengths and capacities of Cambridge neighbourhoods. The study will include 2006 census data and perceptual information from residents and community partners that live and work in Cambridge neighbourhoods. Two earlier publications, *Cambridge in Transition* (1988) and *Cambridge Neighbourhood Trends* (1996) were integral to the establishment of Cambridge Neighbourhood Organizations and the evolution of a number of successful community partnerships.

Thank you for your participation in our on-line survey. We are pleased to advise that qualitative data gathering is now complete. PDF files of short research summaries will be available shortly. The full report will be available later in the year. If you are interested in more information about this research study, contact Dina Etmanskie at 519-623-1713.
